Summary

I am a recent graduate with lots of experience in both self guided and team based work. I'm experienced, confident, capable, and have high motivation for interesting projects.

Skills

I am a diligent worker with a strong work ethic, I will always show up on time, and will keep working until the task is complete. I'm a fast programmer, and I know the intricacies of VR, AR, procedural generation, pathfinding, and AI well. I'm a confident modeller using Blender, and I'm happy to work in Unreal or Unity, in person or remotely. I have experience in working with industry members, and have worked self guided doing commissions for a solid year.

Experience

July 2025 - November 2025

Fantail Games Project – *Cow Wrangler*

- Networked several AR minigames for the team
- Programmed a full minigame, went through several iterations

December 2024 - December 2025

VRChat Commissions – *Avatar, World*

- Iterated on an avatar for several months
- Edited and fixed AI code + set up a scene

July 2024 - November 2024

Grim Forge Games Project – *Stormhaven*

- Designed a spline based travel network
- Utilized pathing algorithms to move player through points over map

Education

February 2023 - November 2026

University of Canterbury, Christchurch – *Product Design*

I'm in my last month of an Applied Immersive Game Design degree at UoC.

Project: July 2025 - November 2025

Product Design Final Year Project Prize 2026 – *University of Canterbury*

Our team won the award for best game design project of 2025 for our AR game ideas for the team of Game Night.

February 2021 - November 2022

Central Hawkes Bay College, Hawkes Bay – *Year 12 and 13 NCEA*

I achieved both year 12 and 13 with excellence level endorsements
